

WATER MANAGEMENT 2022

While water consumption from our operations is relatively low, we recognize that our geographical area of operations is prone to high water stress and risk. Using tools like the World Resources Water Risk Atlas, we monitor our sites for water-related risks, including physical quantity risks, physical quality risks, and regulatory risks. Currently, our Albuquerque site is designated a Medium-High (2-3) overall water risk from the Water Risk Atlas.

With the U.S. government declaring a water shortage for the Colorado River and other water scarcity challenges in the American Southwest, we have implemented programs around water circularity, water use, and water disposal to manage extreme water risk. We also identify opportunities to partner with utilities and other organizations to ensure that we are using this finite resource in a responsible and sustainable manner. We will continue to monitor these risks and develop strategies to manage our water risk exposure in a responsible and transparent way. The data below exclusively reflects water consumption from the Albuquerque facility. We are planning to provide information around water consumption from facilities in Spain in the next report.

Metric	2022	2021	2020
Water Consumption (gallons)	1,168,000	1,174,000	1,352,000

This report contains forward-looking statements that are based on our management's beliefs and assumptions and on information currently available to our management. forward-looking statements involve risks and uncertainties, which may cause results to materially differ from those set forth in the statements. The forward-looking statements may include information concerning our projected future goals, results of operations, business strategies, and industry and regulatory environment. forward-looking statements include statements that are not historical facts and can be identified by terms such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "plan," "potential," "predict," "project," "seek," "should," "will," "would," or similar expressions and the negatives of those terms. forward-looking statements should be evaluated together with the risks and uncertainties that affect our business and operations, particularly those described in more detail in the Company's most recent Annual Report on form 10-K and other documents on file with the SEC, each of which can be found on our website www.arraytechinc.com. Except as required by law, we assume no obligation to update these forward-looking statements, or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future. Topics that may be deemed material under the SASB Standards and/or the GRI Standards are not necessarily material for purposes of the U.S. federal securities laws or for other purposes. for additional information on the SASB Standards and the GRI Standards, please visit their respective websites. Certain of the data contained in this report is based on assumptions and estimates. Actual results may differ from the data presented.
