

GREENHOUSE GAS INVENTORY ANALYSIS 2023

In 2023, we continued to engage our suppliers to manage our full GHG inventory aligned with the GHG Protocol. We achieved even greater engagement from our supply base for key data, improving the accuracy of our inventory and providing us with valuable data to better manage our emissions. In 2023, we also saw improvements in our direct emissions through the increase of renewable energy use. We continue to monitor and manage our emissions to improve the environmental sustainability of our business.

Greenhouse Gas Inventory Parameters and Methodology

Parameters: Our Greenhouse Gas (GHG) inventory captures Array's footprint for the full year 2023 (January 1 – December 31, 2023). This inventory reflects all Scope 1 and 2 emissions and all relevant Scope 3 emission sources. The Scope 2 emissions include both location-based and market-based data, and exclusively reflect sites that are owned and operated by Array. The carbon footprint is calculated in accordance with the Greenhouse Gas (GHG) Protocol. Our inventory takes an operational control approach for determining our operational boundary and is inclusive of all owned and operated Array facilities globally.

Methodology: Our sustainability working group and leadership team worked directly with a third-party climate specialist to engage our network of suppliers and develop a complete GHG inventory. We worked together to identify the material Scope 3 categories and provide the primary data required to accurately calculate our emissions. When primary data was not available, emissions metrics were calculated with estimates from expense data.

Scope 1 and 2: Emissions Breakdown

While Scope 1 and 2 are only responsible for 0.1% of Array's total emissions, we recognize the importance of managing our direct operations. Through our analysis, we identified **electricity usage** as the leading source of emissions, contributing approximately 60% of emissions within Scope 1 and 2 (market-based). Our analysis also revealed that the United States is primarily responsible for Scope 1 and 2 emissions, which provides Array with an opportunity to reduce emissions by increasing our use of renewable energy in our U.S. operations. The second leading contributor to Scope 1 and 2 emissions is gasoline consumed in entity operated vehicles, followed by natural gas.

Scope 3: Emissions Breakdown

Scope 3 is responsible for 99.9% of Array's overall emissions. Specifically, Purchased Goods and Services (Category 1) and Upstream Transportation and Distribution (Category 4) represent over 97% of Greenhouse Gas Emissions within Scope 3.

GREENHOUSE GAS INVENTORY

Scope Category	Emissions (tCO ₂ e)	% Total Market-Based	GRI Standard Reference	SASB Standard Reference
Scope 1	375	<0.1%	GRI 305: Emissions 2016 305-1	N/A
Scope 2 (location-based)	708	—	GRI 305: Emissions 2016 305-2	N/A
Scope 2 (market-based)	574	0.1%	GRI 305: Emissions 2016 305-2	N/A
Scope 3	1,077,875	99.9%	GRI 305: Emissions 2016 305-3	N/A
Category 1: Purchased goods and services	925,608	85.8%	GRI 305: Emissions 2016 305-3	N/A
Category 2: Capital goods	3,906	0.4%	GRI 305: Emissions 2016 305-3	N/A
Category 3: Fuel and energy-related activities	245	0.0%	GRI 305: Emissions 2016 305-3	N/A
Category 4: Upstream transportation and distribution	122,293	11.3%	GRI 305: Emissions 2016 305-3	N/A
Category 5: Waste generated in operations	54	<0.01%	GRI 305: Emissions 2016 305-3	N/A
Category 6: Business travel	4,705	0.4%	GRI 305: Emissions 2016 305-3	N/A
Category 7: Employee commuting	1,156	0.1%	GRI 305: Emissions 2016 305-3	N/A
Category 8: Upstream leased assets	7,983	0.7%	GRI 305: Emissions 2016 305-3	N/A
Category 9: Downstream transportation and distribution	7,633	0.7%	GRI 305: Emissions 2016 305-3	N/A
Category 12: End-of-life treatment of sold products	4,292	0.4%	GRI 305: Emissions 2016 305-3	N/A
Total Direct Emissions (Scope 1 and 2) Market Based	949	—	—	—
Total Direct Emissions Intensity (tCO₂e/SMM Revenue)	1.1	—	—	—
Total Emissions (Scope 1, 2, and 3) Market Based	1,078,823	—	—	—

This report contains forward-looking statements that are based on our management's beliefs and assumptions and on information currently available to our management. Forward-looking statements involve risks and uncertainties, which may cause results to materially differ from those set forth in the statements. The forward-looking statements may include information concerning our projected future goals, results of operations, business strategies, and industry and regulatory environment. Forward-looking statements include statements that are not historical facts and can be identified by terms such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "plan," "potential," "predict," "project," "seek," "should," "will," "would," or similar expressions and the negatives of those terms. Forward-looking statements should be evaluated together with the risks and uncertainties that affect our business and operations, particularly those described in more detail in the Company's most recent Annual Report on Form 10-K and other documents on file with the SEC, each of which can be found on our website www.arraytechinc.com. Except as required by law, we assume no obligation to update these forward-looking statements, or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future. Topics that may be deemed material under the SASB Standards and/or the GRI Standards are not necessarily material for purposes of the U.S. federal securities laws or for other purposes. For additional information on the SASB Standards and the GRI Standards, please visit their respective websites. Certain of the data contained in this report is based on assumptions and estimates. Actual results may differ from the data presented.
