

TASK FORCE ON CLIMATE-RELATED FINANCIAL DISCLOSURES (TCFD) INDEX 2023

Array is committed to climate action and aligning our business strategy and reporting with leading climate frameworks. We have strengthened our climate strategy and reporting by adopting the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD), now part of the IFSB. Our current alignment is included below. We look forward to enhancing our alignment over time and reporting on our progress in future reports.

TCFD Recommendation	Alignment
<p>GOVERNANCE</p> <p>Disclose the organization’s governance around climate-related risks and opportunities.</p>	<p>Our Nominating and Governance Committee has formal oversight of sustainability, including climate strategy and disclosure. The Board regularly reviews our climate strategy, including relevant climate risks, opportunities, metrics, and targets. In addition, our sustainability steering committee and working group oversee priority workstreams for carbon accounting and strategies to reduce our emissions.</p>
<p>STRATEGY</p> <p>Disclose the actual and potential impacts of climate-related risks and opportunities on the organization’s businesses, strategy, and financial planning where such information is material.</p>	<p>Our strategy aims to realize the full benefits of our product and the market opportunities that exist for solar energy deployment while mitigating climate-related risks to our business. This includes ensuring our products are designed to withstand physical climate risks and remaining compliant with relevant regulations. In addition, we remain committed to improving the climate impact of our operations through renewable energy procurement and other strategies to improve our direct carbon intensity.</p>
<p>RISK MANAGEMENT</p> <p>Disclose how the organization identifies, assesses, and manages climate-related risks.</p>	<p>Recognizing that climate change is a risk and an opportunity for our company, we prioritized developing a complete GHG inventory to identify specific areas of climate risk.</p> <p>As a next step, we plan to conduct a formal risk assessment to strengthen our climate strategy, mitigate climate-related risks, and capitalize on opportunities.</p>
<p>METRICS AND TARGETS</p> <p>Disclose the metrics and targets used to assess and manage relevant climate-related risks and opportunities, where such information is material.</p>	<p>Our GHG inventory includes Scope 1, 2, and 3 and provides us insight into our climate performance. We have a formal climate target to reduce our direct emissions intensity, which we have achieved early through operational discipline and increasing our renewable energy in operations. We continue to strategize ways to reduce our emissions intensity. We will continue to report on our progress and share enhanced targets in the future.</p>

This report contains forward-looking statements that are based on our management’s beliefs and assumptions and on information currently available to our management. forward-looking statements involve risks and uncertainties, which may cause results to materially differ from those set forth in the statements. The forward-looking statements may include information concerning our projected future goals, results of operations, business strategies, and industry and regulatory environment. forward-looking statements include statements that are not historical facts and can be identified by terms such as “anticipate,” “believe,” “could,” “estimate,” “expect,” “intend,” “may,” “plan,” “potential,” “predict,” “project,” “seek,” “should,” “will,” “would,” or similar expressions and the negatives of those terms. forward-looking statements should be evaluated together with the risks and uncertainties that affect our business and operations, particularly those described in more detail in the Company’s most recent Annual Report on form 10-K and other documents on file with the SEC, each of which can be found on our website www.arraytechinc.com. Except as required by law, we assume no obligation to update these forward-looking statements, or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future. Topics that may be deemed material under the SASB Standards and/or the GRI Standards are not necessarily material for purposes of the U.S. federal securities laws or for other purposes. for additional information on the SASB Standards and the GRI Standards, please visit their respective websites. Certain of the data contained in this report is based on assumptions and estimates. Actual results may differ from the data presented.
